Master of Go Board Game Is Walloped by Google Computer Program
By CHOE SANG-HUN and JOHN MARKOFF
The match between Google DeepMind’s AlphaGo and Lee Se-dol was seen as a test of how far research into artificial intelligence has come. For a few more details, see http://www.wired.com/2016/01/in-a-huge-breakthrough-googles-ai-beats-a-top-player-at-the-game-of-go/

Tom Wheeler, chairman of the Federal Communications Commission, said Internet service providers have a “broad view of all of your unencrypted online activity.”

F.C.C. Proposes Privacy Rules for Internet Providers
By CECILIA KANG The rules call for broadband providers to disclose how data about users’ online browsing may be collected and for better security of such data.

A Trip Through Amazon’s First Physical Store
By ALEXANDRA ALTER and NICK WINGFIELD
Two reporters discuss and marvel at what is and isn’t in Amazon’s sole brick-and-mortar store as it plans to expand its physical locations.
