

Congressman Dan Lipinski Cordially Invites You:

Policy Roundtable --- “The Road Ahead: Developing Policies to Make Connected & Automated Vehicles a Reality”

June 22nd, 2016 --- 2:30 PM to 4:00 PM

2253 Rayburn House Office Building (T&I Committee Hearing Room)

Connected and automated vehicles have the potential to save tens of thousands of lives each year, while also allowing more vehicles to efficiently travel on existing roads. However, this all depends on developing reliable systems with secure communications and under a regulatory framework that promotes innovation and provides certainty for companies making long term investments. Congressman Dan Lipinski is hosting a Washington, DC roundtable event regarding policies and issues that may assist in the development of connected and automated vehicle. The roundtable will consist of 8-10 other policy experts with the goal of identifying relevant policy issues and working toward collaborative solutions in this space on issues ranging from technology deployment, research and development agenda, infrastructure requirements, regulatory environment, and ensuring vehicle cybersecurity.

Many automakers have announced partnerships with technology companies to develop automated vehicle technology, and some have plans to introduce models with such features this year. The goal of the roundtable is to **bring together stakeholders to identify challenges and opportunities toward the full integration of this technology in the nation’s transportation network.**

Confirmed Attendees:

- **David Strickland, Director**, Self-Driving Coalition for Safer Streets; Counsel, Venable; *former Administrator, NHTSA*
- **Nat Beuse, Associate Administrator for Vehicle Safety Research**, US Department of Transportation
- **Ginger Goodin, Member, Transportation Research Board; Senior Research Engineer**, Texas Transportation Institute
